IBC 2009-2022 Compliant, High Performance, Photoluminescent Green, Building Safety Paint

High performance photoluminescent paint kit consisting of a white base coat, tough epoxy green glowing photoluminescent coat with integrated sealer, and a very durable top coat. Pale green colored under normal light. Ideal for floor applications in exit stairwells where IBC 2009-2022 IBC Photoluminescent Safety Markings are specified. This product complies with Section 1024.4 of the IBC 2009.-2022 Extremely economical when compared to tape products.

Part Number: **HPPBP01-IBCK-P**

Unit: **Gallon Kit**

NYC MEA Approved, High Performance, Photoluminescent Green, Building Safety Paint

High performance photoluminescent paint kit consisting of a white base coat and a tough epoxy green glowing photoluminescent coat with integrated sealer. Pale green colored under normal light. Ideal for floor applications in exit stairwells where other products may not hold up over time. This product has been approved by the NYC Department of Buildings and assigned MEA # 387-07-M. Extremely economical when compared to tape products.

Part Number: **HPP012DGNK-P**

Unit: **Gallon Kit**

High Performance Photoluminescent Green Marking Paint

High Performance photoluminescent green marking paint kit consists of a white base coat and a tough epoxy glowing photoluminescent coat with integrated sealer. Pale greenish-white under normal light, but produces a bright green glow when the lights are out. Our AfterGlo® Brand Photoluminescent Paint is ideal for filling lines and characters engraved into flat or curved surfaces where the lines and characters need to be visible in low light situations. Suitable for filling specialty engravings and markings and a good replacement for AA-3059 type paints. Our AfterGlo® Brand latex PL paint kits are available in 2 fl-oz., 4 fl-oz., 8 fl-oz., 16 fl-oz., and 32 fl-oz. sizes.

Part Number	Size
HPP012DGNK-P002	2 OZ
HPP012DGNK-P004	4 OZ
HPP012DGNK-P008	8 OZ
HPP012DGNK-P016	16 OZ
HPP012DGNK-P032	32 OZ

Emergency Telephone 12" x 4"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **BS6000VGRE-P**

Unit: **Each**

Breathing Apparatus Green 12" x 4"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **BS6050VGRE-P**

Unit: **Each**

Emergency Equipment Green 12" x 4"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **BS6070VGRE-P**

Unit: **Each**

Custom Severe Weather Area 4" x 6"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **BS6501VRRE-P**

Unit: **Each**

Shelter In Place Sign 8" x 4"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **BS6500VGRE-P (Green Letters)**

Unit: **Each**

Part Number: **BS6500VRRE-P (Red Letters)**

Unit: **Each**

Safe Room Sign Green 8" x 4"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **BS6510VGRE-P**

Unit: **Each**

Exit Sign

The photoluminescent layer is bonded with either a semi-rigid substrate, incorporating a foam polyester tape adhesive or a pressure sensitive (peel and stick) adhesive. The peel and stick adhesive is suitable for indoor applications on smooth surfaces while the foam polyester tape adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number	Size	Color	Type
ES099LVGPE-P	12" x 8"	Green	Peel & Stick
ES099LVRRE-P	12" x 8"	Red	Semi-Rigid

No Exit Green Semi-Rigid 8" x 8"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **ES100NVGRE-P**

Unit: **Each**

Exit Green Semi-Rigid 12" x 6"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **ES1020VGRE-P (Right)**

Unit: **Each**

Part Number: **ES1030VGRE-P (Left)**

Unit: **Each**

Exit Person Green Semi-Rigid 12" x 6"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **ES1040VGRE-P (Right)**

Person Arrow Exit Green Semi-Rigid 12" x 6"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **ES1080VGRE-P (Right)**

Unit: **Each**

Part Number: **ES1090VGRE-P (Left)**

Unit: **Each**

Exit Person Door Green Semi-Rigid 12" x 6"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **ES1100VGRE-P (Right)**

Unit: **Each**

Part Number: **ES1110VGRE-P (Left)**

Unit: **Each**

Exit Stairs Down Green Semi-Rigid 12" x 6"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **ES1120VGRE-P (Right)**

Exit Arrow Semi-Rigid Green 12" x 4"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **ES1280VGRE-P (Right)**

Unit: **Each**

Part Number: **ES1290VGRE-P (Left)**

Unit: **Each**

Fire Telephone Red Semi-Rigid 12" x 4"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **FF3000VRRE-P**

Unit: **Each**

Fire Extinguisher Red Semi-Rigid 12" x 4"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **FF3030VRRE-P**

Unit: **Each**

Fire Hose Red Semi-Rigid 12" x 4"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

In Case of Fire Pull Alarm Black/Red 4" x 4"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **FF3280VMRE-P**

Unit: **Each**

In Case of Fire Use Stairs Black/Red/Green 6" x 6"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **FF3320VMRE-P**

Unit: **Each**

Fire Extinguisher Red 6" x 6"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign. **Not suitable for military vehicle environment.**

Part Number: **FF3330VRRE-P**

Unit: **Each**

Hose Reel Red 6" x 6"

The photoluminescent layer is bonded with a semi-rigid substrate, incorporating a foam polyester tape adhesive. The long-lasting adhesive is suitable for either smooth or rougher surfaces like CMU (Concrete Masonry Unit) blocks. This substrate material minimizes surface imperfections on the sign.

Part Number: **FF3340VRRE-P**

AfterGlow, LLC UL 924 EXIT Sign; 50', 75', or 100' Viewing Distance; Molded in Red, Green, or Black LEXAN®; and, Single or Double Face **(PATENT PROTECTED IN THE U.S. AND CANADA)**

AfterGlow, LLC UL 924 EXIT sign; 50', 75', or 100' viewing distance; molded in red, green, or black LEXAN®; and, single or double face - 16" x 8-1/2" x 3/8". UL-924 rated signs specifically tested for building compliance. The signs are approved for both high-level and low-level installation. These signs are rated for 50', 75', or 100' line-of-sight viewing distances. EXIT signs reduce Green House Gases (GHG) since no electricity is needed. The signs are suitable for wall, flag or ceiling mounting. They do not use radioactive materials. They do not require bulb replacement or monthly/annual testing or maintenance. Properly selected and installed, these signs last for years and work even if damaged. An approved repair kit is available in the event they are vandalized.

CERTIFIED FOR USE IN CANADA. CERTIFIED FOR LOW LOCATION INSTALLATION
CERTIFIED FOR INTERIOR/EXTERIOR USE
